

How long does it take?

Wraparound is an intensive program that usually lasts 1-2 years.

At the beginning, a family can expect to have 2-3 Wraparound meetings per week. Once a team is developed, teams meet 1-2 times a month until the end of the program.

Families will also meet with the Care Coordinator, Family and Youth Partner in-between team meetings.

Where can I find more information?

Polk County Wraparound Services

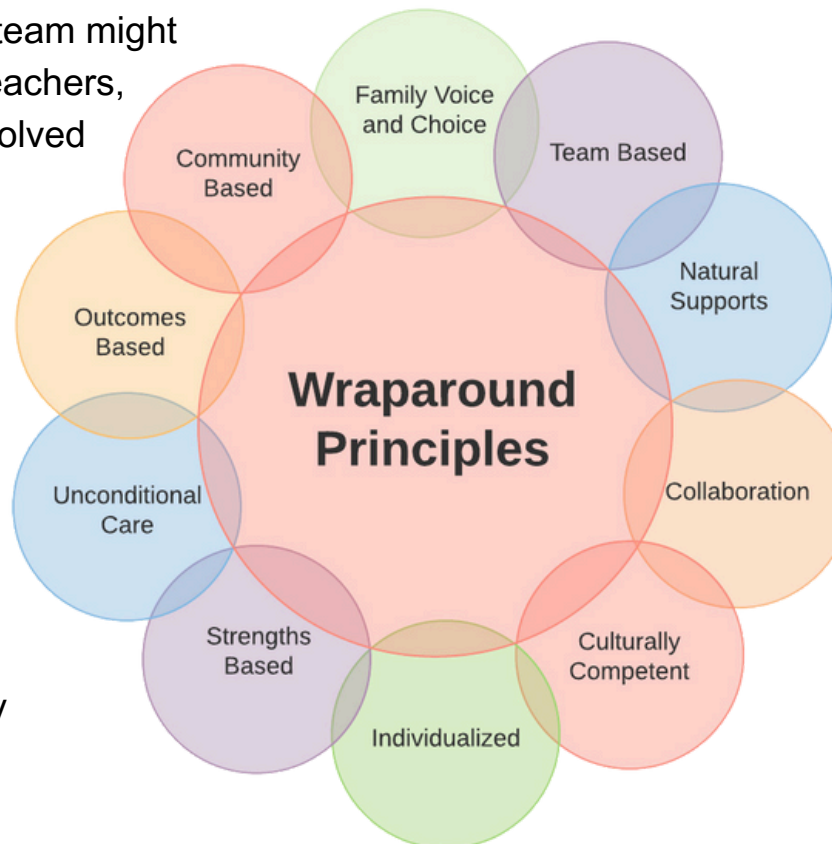

What is Wraparound?

Wraparound is a care planning process for youth with mental health concerns and complex needs. Parents or guardians may request Wraparound Services when counseling has not been enough to safely address serious concerns.

The Wraparound process begins with identifying the strengths, needs, and culture of the youth and family. The youth and family work with a Wraparound Care Coordinator to form a Wraparound Team. The Team is there to support the youth and family. The Team helps create a plan that focuses on needs and builds on strengths. A team might include friends, relatives, teachers, and other professionals involved in the youth's life.

The types of service and supports on a plan will depend on individual needs. The setting of where services will take place depends on needs and safety concerns.

Participation in Polk County Wraparound is voluntary.

How can it help me?

A recent study found that Wraparound provided the following benefits for youth:

- Decreased out-of-home placements
- Enhanced mental health
- Increased school attendance and academic achievement
