

POLK COUNTY
FAMILY & COMMUNITY OUTREACH

FALLS CITY

HEALTHCARE ACCESS AND
BARRIERS SURVEY

*Funded Through a Grant from
The Willamette Health Council
Salem, Oregon*

Survey Overview

Polk County's Family & Community Outreach Department received a grant to survey Falls City area residents about their health and wellness needs and barriers.

- \$24,500 Willamette Health Council Grant
- Digital and paper survey options
- 24 questions – 91 data points
- October 17th-December 17th
- Incentives provided

Project Goals

OUR PROJECT HAD TWO MAIN GOALS:

GOAL 1:

To determine the family and community healthcare utilization and needs/barriers

GOAL 2:

To identify potential avenues and the necessary resources to meet those needs, including the viability of telemedicine and mobile health options

Timeline

Outreach

- Table tents at local restaurants
- Post card mailed to all Falls City addresses
- Survey notification in water bill mailer
- Yard signs placed around Falls City
- Presence at Falls City events
- Flyers in paper and digital format sent from school to families
- Posters at general store, post office, and other local businesses

How Respondents Learned About The Survey

Outreach Success

Falls City & Survey Respondent Demographics

Falls City is a largely rural area with no physical healthcare or dental services providers located within the zip code, and no public transportation available.

	Falls City 2020 Census	Survey Respondents With Falls City Address	Total Survey Respondents (4 mile radius beyond FC)
Households	4 16	182	240
Total Population	10 5 1	591	782
Adults	8 3 1	423	554
Children	2 2 0	168	228

Survey Respondent and Household Characteristics

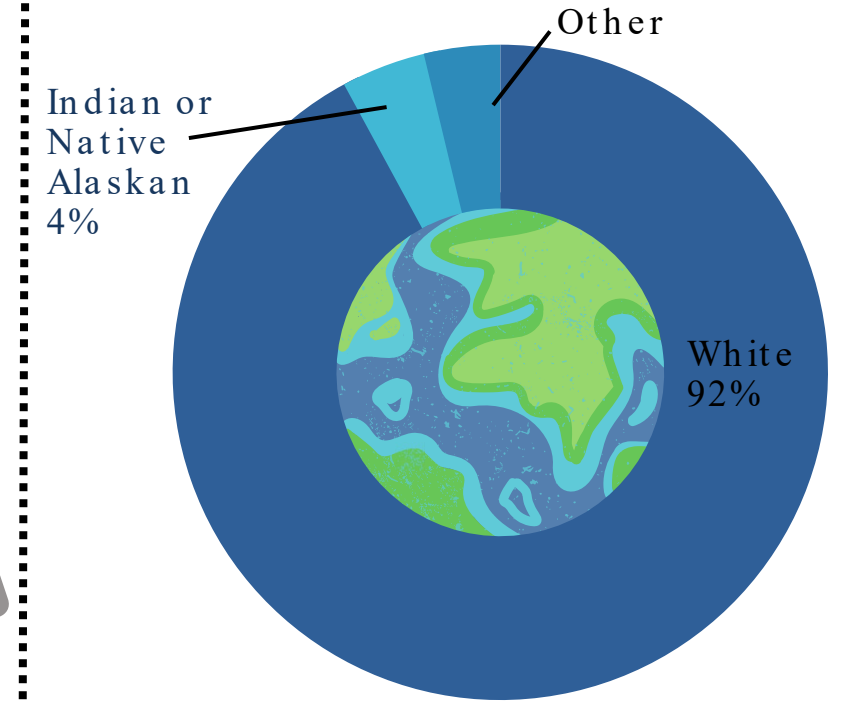

Respondent Gender Identification

Respondent Age Range

Respondent Race or Culture Self Identification

Households with Children

Respondents by Insurance Type

Respondent Employment Status

Household Internet Access

Survey Results

Regularly Visit Doctor and Dentist

All Respondents

 Doctor Visits

 Dentist Visits

Emergency Room Visits by Insurance

	No Insurance	Medicare	OHP/ Medicaid	Private
Monthly or More Often	0%	0%	3%	0%
Every 6 Months	0%	4%	12%	4%
Yearly or Less Often	30%	41%	57%	54%
Do Not Use or No Response	70%	54%	28%	42%

Urgent Care Visits by Insurance

	No Insurance	Medicare	OHP/ Medicaid	Private
Monthly or More Often	0%	0%	4%	1%
Every 6 Months	10%	0%	18%	18%
Yearly or Less Often	40%	32%	48%	47%
Do Not Use or No Response	50%	68%	31%	34%

Barriers

45% of all respondents did not seek healthcare in the past year because of 1 or more of the following barriers

Barriers: OHP/ Medicaid Insured Compared To All Other Respondents

Barriers (by Insurance Type)

No Barriers

Takes Too Long to Get in to See My Doctor

My Doctor is Too Far Away

I Can't Find a Doctor to Take My Insurance

It's Too Hard to Schedule an Appointment

Did Not Seek Care at Least Once in the Past Year Because of a Barrier

Survey Results

VIRTUAL AND MOBILE
ACCESS TO CARE

All Respondents:

Regular Doctor

Dental Care

Mental Health Care

Eye Care

Physical Therapy

Medical Specialist

Would Access Care Virtually (by Insurance Type)

No Insurance

Medicare

Medicaid/OHP

Private

Would Access Mobile Health Care (by Insurance Type)

Regular Doctor

Mental Health/Counselor

Dental

No Insurance

Medicare

Medicaid/OHP

Private

Respondents With Children: Virtual and Mobile Healthcare Access

HAVE Accessed Regular Doctor Virtually

HAVE Accessed Mental Health Virtually

WOULD Access Regular Doctor
Mobile Health Services

WOULD Access Mental Health
Mobile Health Services

Virtual Visits & No Barriers (by Internet Access Type)

Resource Needs in Falls City Area

Key Findings:

DEMOGRAPHICS

- 40% of Falls City households returned a survey representing 782 people
- Almost 90% of households have internet access of some kind
- 8% of respondents identified as uninsured

Key Findings:

ACCESS/ BARRIERS

- 84% of respondents indicate they see a regular doctor at least yearly
- 63% of respondents indicate they see a dentist at least yearly
- 42% of respondents reported "healthcare costs too much"
- 44% of respondents reported "it takes too long to get in to see my doctor"
- 45% of all respondents and 58% of OHP/Medicaid respondents reported they did not seek care at least once during the past year due to one or more listed barriers

Key Findings:

VIRTUAL/ MOBILE

- 49% of respondents reported having had a virtual doctor visit and 63% indicated they would consider utilizing virtual healthcare in the future
- 25% of respondents reported accessing mental health or counseling virtually
- 62% of respondents indicated they would utilize mobile healthcare to see a regular doctor
- Respondents with children had a 59% rate of virtual visits with doctors compared to the general survey rate of 49%

Summary

- Data shows limited racial and cultural diversity but diverse healthcare attitudes and access.
- Respondents identified a desire to have a collection of outreach, education, and hybrid (mobile and virtual) access options for healthcare services.
- To address the access options identified by respondents will require collaboration between healthcare entities, government and community leaders.

Recommendations

- Convene a steering committee
- Engage the Falls City community through a robust healthcare event in spring of 2023
- Examine the feasibility of establishing a physical healthcare location in Falls City
 - This could also serve as a mobile docking station for virtual & in-person care
- Establish and publicize a *Health and Wellness Connections* website listing available health-related resources with links to training modules as well
- Identify/ apply for grants to improve the use of technology for households in rural areas
